

The Hunt for **Superflex**

This week you learned about different types of thinking- *Superflexible* Thinking and **Rock Brain** (Not-So-Flexible) Thinking. In our session, we experimented with the difference between items that were soft/flexible **JUST LIKE OUR *Superflexible Brains*** and items that were **Hard** and did not move, much like those brains invaded by **Rock Brain**. Now take a look around your house and see if you can find some more items that help us think about these concepts.

List or draw three items in your house that are flexible and can change their shapes to represent *Flexible Thinking*.

- 1.
- 2.
- 3.

List or draw three items in your house that are not so flexible and have a hard surface, to represent **Rock Brain Thinking**.

- 1.
- 2.
- 3.

Now search for someone who is showing signs of *Superflexible Thinking*. What did he or she do?

Now search for someone who is showing signs of **Rock Brain Thinking**. What did he or she do?
