Does *Superflexible* thinking run in your family? (circle one) *Yes* **NO**

CAUTION!!! Be Aware that parents do not always have to use their Superflexible thinking. Because they are the parents, they are responsible for their children's safety and health and have to make major decisions about the family, which may mean that they have to stick to a decision they feel is best for the family. Can you think of an example when they may not be able to use their flexible thinking?
